DEFINITIONS

Building: A structure with a roof, attached to a foundation, serviced by a utility (exclusive of lighting), requiring significant maintenance, tracked in Archibus, and used for temporary shelter of people, animals, plants, materials, or equipment.

GSF: Gross Square Feet – The sum of all areas within exterior faces of walls, including mechanical rooms, and all vertical penetration areas such as air shafts.

NASF: Net Assignable Square Feet – The sum of all areas available for occupants or specific use, not including mechanical rooms or vertical penetration areas.
